# Chongqing University of technology Md Anower Hossain(an hao ming)

Student ID: 62017010084

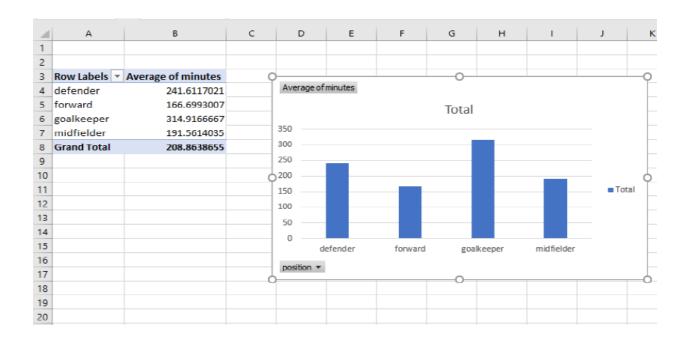

Assignments -2

7<sup>th</sup> Semester

Sub: Big data technology and practice

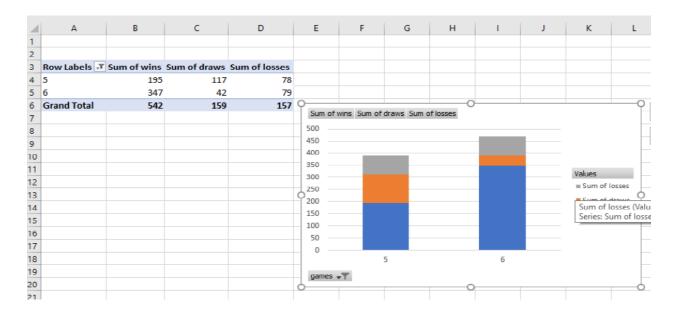

Problem11: Create a bar chart showing the average number of minutes played by players in each position.

Ans:

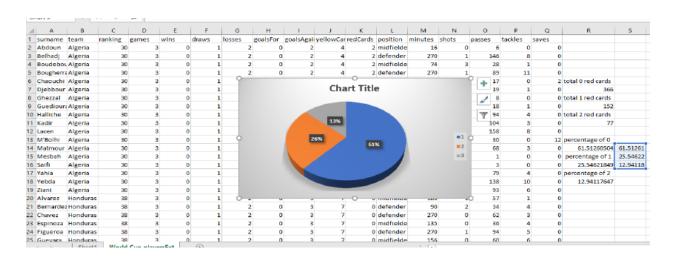

Problem 12. Create a stacked bar chart showing teams that played more than 4 games, with their total number of games divided into wins, draws, and losses.

## Ans:

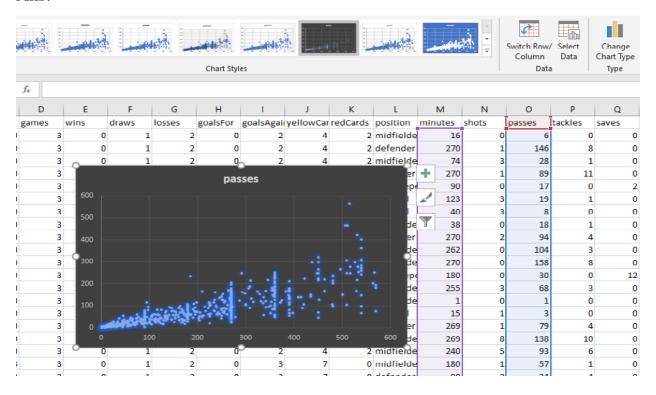

Problem 13. Create a pie chart showing the relative percentage of teams with 0, 1, and 2 red cards.

Problem 14. Create a scatterplot of players showing passes (x-axis) versus minutes (y-axis). (If you know anything about the World Cup you might think about why there are lines of dots.)

## Ans:

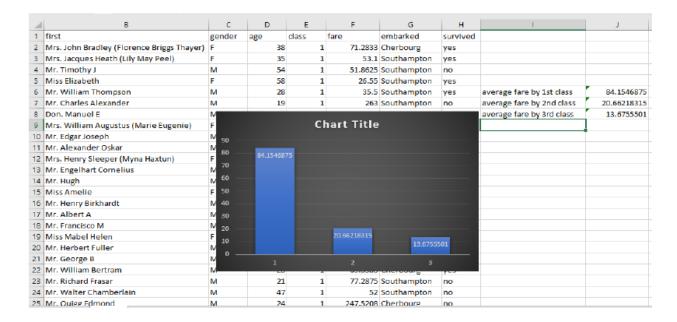

Problem 15. Create a map of countries colored light to dark blue based on how many goals their team made ("goalsFor").

Problem 16. Create a bar chart showing the average fare paid by passengers in each class. The three bars should be labeled "first", "second", "third".

### Ans:

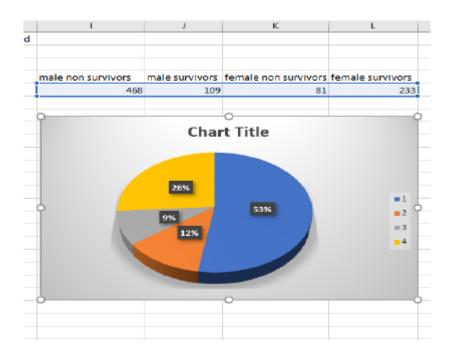

Problem 17. Create a stacked bar chart showing the number of passengers in each class, divided into male and female (three bars). Then reverse roles and show the number of passengers of each gender, divided into class (two bars).

Problem 18. Create a pie chart showing the relative number of male survivors, male non-survivors, female survivors, and female non-survivors (four slices).

## Anss:

Problem 19. Let "youth" denote passengers whose age is under 18, "adult" denote passengers age 18-59, and "senior" denote passengers whose age is 60 and above. Create a pie chart with four slices showing the relative number of youth, adult, senior, and those whose age is unknown. Hint: consider using function ==if(\*,\*,if(\*,\*,\*))
